

## Product Sheet: eBridge for Microsoft® CRM

### Successfully Integrate Mid-Range Accounting Applications with Microsoft® CRM

eBridge Software provides packaged (including software, implementation services and support) MS CRM integration solutions for the small to mid market. eBridge is the only solution provider that can provide a universal solution which integrates MS CRM to many different backend accounting applications.

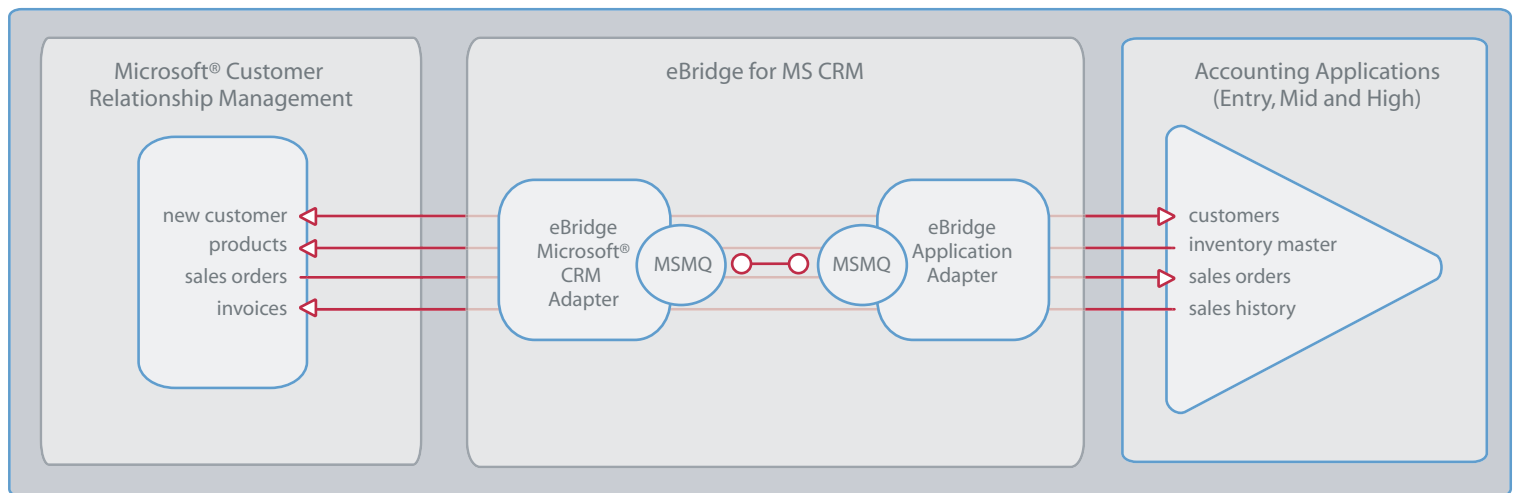

Supporting native XML and using Microsoft technologies, eBridge adapters eliminate the complexity and the cost associated with alternative integration products, providing a rapid return on investment.

### New! Product Overview

NEW ~ eBridge adapters now have built in MSMQ services/document brokerage functionality to manage the asynchronous flow of data directly from one application to the other. As a result, additional software components are not required and a cost effective integration solution is now available for SMB clients.

The out-of-the-box solution is quickly deployable reducing the time and resource costs associated with complex integration projects. *(The eBridge solution is scalable and may be modified to accommodate additional data integration requirements as needed)*

### eBridge for MS CRM Solution Diagram

### The Winning Formula ~ Summary of benefits associated with selecting the eBridge solution:

#### The Microsoft® CRM Advantage

- increase sales
- deliver superior customer service
- make informed, agile business decisions
- connect information and processes across your business

#### eBRIDGE Integration Advantage

- quickly process new and existing customer sales orders
- arm your sales and customer service representatives with key information including customer sales history, contact and credit information, product data, etc.
- a single master customer record provides for accurate and reliable data across the organization
- integrating your CRM and accounting applications minimizes manual re-keying of data, avoiding errors and data duplication

## About eBRIDGE Software Inc.

Founded in 1993, eBRIDGE Software Inc. ([www.ebridgesoft.com](http://www.ebridgesoft.com)) is a global leader in the SMB market for electronic application integration. eBRIDGE has created a range of products that seamlessly integrate business transaction data, bi-directionally from various sources including EDI (ANSI x12 and EDIFACT), Extensible Markup Language (XML), Microsoft® BizTalk® Server, Comma Separated Values (CSV), and flat files. Leveraging the business logic of accounting applications, the company's universal software solutions provide accurate and reliable data exchange between mid-market accounting applications and a range of B2B and B2C programs such as CRM, web storefronts, warehouse management, and business process management.
